Office Action Summary	Application No. 10/063,797	Applicant(s) HOLSTEN ET AL.	
	Examiner Terrence R. Till	Art Unit 1744	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to because in figure 3A the section line is identified as A-A. 37 CFR 1.84(h)(3) states that applicant should use Arabic or Roman numerals at the ends of a section line. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. The claims are objected to because they lack a proper introduction. The present Office practice is to insist that each claim must be the object of a sentence starting with "I (or we) claim", "The invention claimed is" (or the equivalent). MPEP § 608.01(m).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Waters.

5. The patent to Waters discloses an appliance 10 and a holder 14 for holding accessories comprising a pivot portion 16,17 rotatably connectable to the appliance and a connection 19,22. The connection comprising a tab (as seen in the drawing) for fitting into the slot 23 of the appliance. It should be noted that the preamble of claim 1, particularly the recitation that the holder is removable, is not considered to have any influence over the body of the claim. Further, the recitation that the slot is on the "upper" end of the appliance is considered relative.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Golden et al.

7. The patent to Golden et al. discloses an appliance 11 and a holder 20 for holding accessories (roller) comprising a pivot portion 40 rotatably connectable to the appliance and a connection 53-55. As can be seen in figure 2 the pivot portion comprises a groove at a lower end of the holder. It is considered that the groove is connected to an "axle" 13 of the appliance.

Allowable Subject Matter

8. Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claims 9-27 are allowed.

10. The following is an examiner's statement of reasons for allowance: with respect to claim 9, the prior art does not disclose nor render obvious the claimed combination of an appliance having accessories comprising a first pivot portion on the appliance; a first connection portion on the appliance; a holder for holding the accessories being removable from the appliance; a second pivot portion on the holder being rotatably connectable to the first pivot portion of the appliance, the first and second pivot portions permitting rotation of the holder in a rotational direction when connected; and a second connection portion on the holder being positively coupleable to the first connection portion of the appliance, the first and second connection portions at least restricting removal of the holder from the appliance in the rotational direction when positively coupled.

With respect to claim 19, the prior art does not disclose nor render obvious the claimed combination of a device for an appliance having accessories comprising means for holding the accessories; means for removably connecting the holding means to the appliance, the holding means being rotatable in a rotational direction about the removably connecting means; and first means for restricting removal of the holding means from the appliance in the rotational direction. The "means for" language being interpreted under 35 USC 112, sixth paragraph.

Art Unit: 1744

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

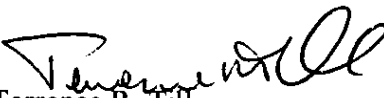

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Riczinger et al., Wareham et al., McKnight, Berfield, Roney et al. and Kim disclose vacuum cleaners with accessory attachment devices. The patents to DeBord, Wilkinson and Jackson show containers with mounting means similar to that disclosed by applicants.
